

# ALFA 95 UPPER

This one comes straight from the TOP

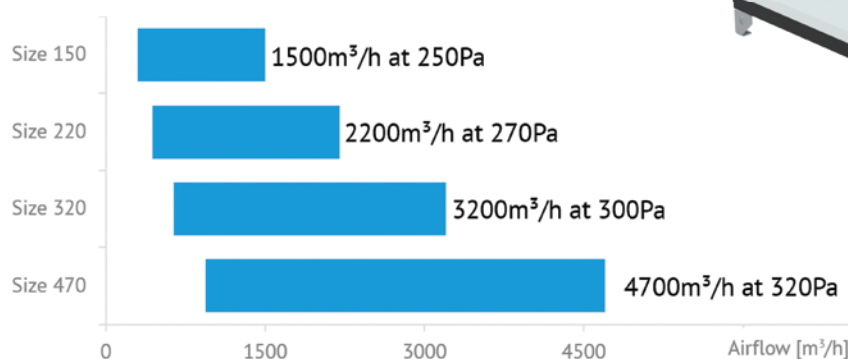

ALFA 95 UPPER - commercial heat recovery units **with top connections**, designed for inside installation providing airflow performance from 1500 m<sup>3</sup>/h up to 4700 m<sup>3</sup>/h.

The perfect combination of smart casing design, selection of hi-tech materials and components, topped up with intelligent **AirGENIO control** delivers ventilation units with low sound, high energy-efficiency and compact dimensions – all units **fit through a 900 mm wide door**. Besides that the range offers a wide choice of post-heaters – electric, water, DX and 4-pipe C/O coils, option of electric pre-heater also available.

Integrated AirGENIO control system allows remote control (BMS network, service SW, mobile app) or on-line control via **AirGENIO Cloud**.
